

Halloween Garland

Supplies Needed:

- Halloween shapes print outs (bat and ghost)
- Orange & black cardstock
- Book pages (4)
- Twine (6 feet)
- Glue
- Scissors
- Pencil

Step 1: Cut out the bat and ghost shapes to use as stencils. You can also use them as part of the garland once you are done tracing.

Step 2: Trace, cut and layer your ghosts and bats any way you choose! When creating a back layer, remember to trace the outline larger than the stencil. Each book page has enough space for two shapes. Glue the layers together.

Step 3: Personalize your ghosts and bats - decorate them or add details like eyes. You can also fold them to give some movement.

Step 4: There are many options for attaching your cutouts to the twine.

- Punch two holes on each shape and feed the twine from the front so that it does not block your shape. Or use one hole and cut a small piece of twine to create a loop to hang.
- Simply tape the twine across the back of your shapes.
- Use glue to attach the twine to the cutout. A stronger hold would be to glue the twine between the layers (at the end of step two).
- Attach your cutouts to the twine with mini clothes pins for a fun touch! They can also be decorated to add more festive flare.

Personalization: Create your own stencils! Make witch hats, pumpkins, or cats! Have fun layering with different papers and decorating with glitter and color! Have a fun and safe Halloween!

Happy crafting!
